

## CONTENTS OF VOLUME 3, 1988

### Number 1

- |  |    |  |
|--|----|--|
| J. W. Morley, J. W. Lindsey and S. J. Judge                                | 1  | Prism-adaptation in a strabismic monkey  |
| L. T. Sharpe, D. van Norren and K. Nordby                                  | 9  | Pigment regeneration, visual adaptation and spectral sensitivity in the achromat   |
| N. Wioland, G. Rudolf and N. Bonaventure                                   | 19 | Iodate poisoning of the retina. A highly species-dependent process. Electrophysiological evidences                                 |
| Eberhart Zrenner and Ralph Nelson  | 29 | Spatial characteristics of scotopic threshold responses in the corneally recorded electroretinogram elicited by multispot patterns |
| W. Skrandies and K. P. Leipert   | 45 | Visual field defects are not accompanied by electrophysiological evidence of transsynaptic retrograde degeneration                 |
| Ruth E. Manny, Karen D. Fern, David S. Loshin and Ana T. Martinez          | 59 | The effects of practice on contour interaction   |
| Vivienne C. Greenstein, Donald C. Hood, Irwin M. Siegel and Ronald E. Carr | 69 | A possible use of rod-cone interaction in congenital stationary nightblindness   |
| <i>Open Letter</i>   |    |  |
| Merrick J. Moseley and Alistair R. Fielder                                 | 75 | Light toxicity and the neonatal eye  |

### Number 2

- |   |     |   |
|---|-----|---|
| Frank Schaeffel and Howard C. Howland       | 83  | Visual optics in normal and ametropic chickens  |
| C. F. Wildsoet and J. D. Pettigrew          | 99  | Experimental myopia and anomalous eye growth patterns unaffected by optic nerve section in chickens: evidence for local control of eye growth |
| Stevan M. Dawis and Günter Niemeyer         | 109 | Similarity and diversity of monoamines in their effects on the standing potential, light peak and electroretinogram of the perfused cat eye   |
| P. Gouras and C. J. MacKay                  | 119 | Detecting early postchiasmatic visually evoked responses  |
| Teri B. Lawton                              | 125 | Improved word recognition for observers with age-related maculopathies using compensation filters   |
| Julie R. Brannan and Mary C. Williams       | 137 | The effects of age and reading ability on flicker threshold   |
| Clifton M. Schor and Leon N. McLin Jr       | 143 | The effect of luminance on accommodative and convergence after-effects  |
| <i>Technical Note</i>                       |     |   |
| Vasudevan Lakshminarayanan and Jay M. Enoch | 155 | The MacLeod selective adaptation paradigm in cases with modest cataracts  |

### Number 3

- |   |     |   |
|---|-----|---|
| Ch. Remé, E. Federspiel-Eisenring, Th. Hoppeler, J. Pfeilschifter and C. Dietrich | 157 | Chronic lithium damages the rat retina, acute light exposure potentiates the effect |
| Aries Arditi  | 173 | The volume visual field: a basis for functional perimetry                           |
| Michael Bach, Mark W. Greenlee and Bernd Böhler                                   | 185 | Contrast adaptation can increase visually evoked potential amplitude                |

Fred H. Previc

- 195 The neurophysiological significance of the N1 and P1 components of the visual evoked potential

Joel M. Weinstein, Arlene V. Drack,  
James N. VerHoeve and Carey D. Balaban

- 203 Saccade amplitude and direction influences on the human presaccadic potential

D. P. Crewther, P. M. Kiely, A. McCarthy  
and S. G. Crewther

- 213 Evaluation of paraxial photorefraction in screening a population of monkeys for refractive errors

#### Research Reports

Sheila Gillard Crewther, John Nathan,  
Patricia M. Kiely, Noel A. Brennan  
and David P. Crewther

- 221 The effect of defocussing contact lenses on refraction in cynomolgus monkeys

L. F. Dell'Osso, S. Tracis, L. A. Abel  
and S. I. Erzurum

- 229 Contact lenses and congenital nystagmus

#### Announcement

I

### Number 4

M. J. Jaffe, R. C. Caruso,  
M. C. S. Koppelman, M. A. von Fricken  
and K. E. Higgins

- 233 Chiasmal compromise: neurosensory characteristics of incomplete recovery

Dennis M. Levi, Yen Lee Yap  
and Mark W. Greenlee

- 243 Is amblyopia an anomaly of photopic vision?

Urs Gerber and Günter Niemeyer

- 255  $\beta$ -Adrenergic antagonists modify retinal function in the perfused cat eye

#### Research Reports

L. T. Sharpe, K. van den Berge,  
L. H. van der Tweel and K. Nordby

- 267 The pupillary light reflex in a complete achromat

Angela J. Hobley and Graham F. A. Harding

- 273 The effect of eye closure on the flash visually evoked response

Irene Gottlob and Elfriede Stangler-Zuschrott

- 279 Scotomas and pattern-electroretinograms in amblyopia

Judith Robinson, Merrick J. Moseley  
and Alistair R. Fielder

- 285 Grating acuity cards: spurious resolution and the "edge artifact"

#### Technical Note

J. Barton and R. J. Watt

- 289 An electronic oscilloscope spot diffuser for measuring neural blur

#### Announcement

I
